Re: TAPCO Comments on Docket No. FHWA-2020-0001 National Standards for Traffic Control Devices

To All Concerned:

TAPCO has been serving the US traffic industry since 1956 with innovative traffic safety solutions and is proud to have multiple team members actively participate in the NCUTCD. We are grateful to have the opportunity to review and provide input to the proposed amendments, which are attached separately using the form provided. We eagerly await the finalization and publication of the 11th edition of the MUTCD as so many of our communities and customers rely upon its guidance. We also ask that the FHWA plan for regular and frequent updates once the final rules are published so that they keep current with the latest innovations and technology to improve roadway safety. Lastly, we expect that the FHWA will seriously consider and incorporate our comments as well as those comments provided by the NCUTCD regarding the NPA.

Sincerely,

Michael Long
